Hardening for DevOps

SECURITY RULESETS

RED HAT 7.6

Effective security relies on DevSecOps teams understanding the various hardening rulesets that are available. Here are the most common rulesets for Red Hat 7.6

PCI-DSS

The Payment Card Industry Data Security Standard is employed in organizations that utilize credit card processing, point-of-sale devices, and web shopping applications.
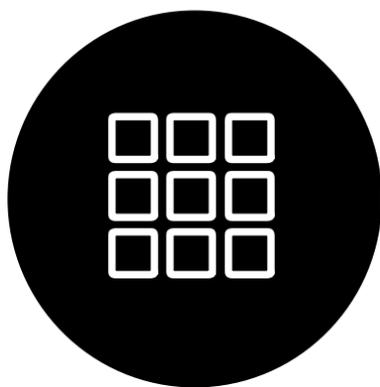

OSPP

The Operating System Protection Profile is a hardening profile that applies to general purpose operating systems in a network environment using centralized services.

NIST-800-171

The National Institute of Standards and Technology released this security standard to meet the requirements of the Defense Federal Acquisition Regulation Supplement (DFARS) minimum security requirements.

DISA STIG

The Defense Information Systems Agency Secure Technical Implementation Guidelines are defense department requirements for the security of all networked systems .

RED HAT CORPORATE

This profile contains the minimum security settings recommended by Red Hat for use on Linux instances.

SECURITY RULESETS

RED HAT 7.6

Effective security relies on DevSecOps teams understanding the various hardening rulesets that are available. Here are the most common rulesets for Red Hat 7.6

HIPAA

The Health Insurance Portability and Accountability Act standard is designed to maintain the integrity, confidentiality, and security of electronic personal health information.

US BASELINE

USGCB

US Government Configuration Baseline reflects the United States government consensus content for a baseline security profile.

STANDARD SYSTEM

This profile contains rules to ensure standard security baseline of a Red Hat Enterprise Linux 7 system. Regardless of your system's workload all of these checks should pass.

C2S

The Commercial Cloud Services ruleset provides compliance against the U.S. Government Commercial Cloud Services baseline which was inspired by the Center for Internet Security (CIS) Red Hat Enterprise Linux 7 benchmark.

CJIS

The Criminal Justice Information Services profile is derived from the Federal Bureau of Investigation's security policy.
